Storm Bars (top or bottom)						
<p>***IF STORM BARS ARE REQUIRED, THE COST FOR THE METAL IS IN ADDITION TO THAT OF THE COST FOR THE COLONIAL. WE MUST BE ADVISED OF THE TYPE (TUBE / ANGLE) AND DESIRED PLACEMENT -- <b>WHERE DO THE JACK NUTS NEED TO BE ? USE SECTION BELOW FOR DIRECTIONS</b></p>						
<p>Finish width is the total width of panel and does not include any hinges. Please see product approval drawings for dimensions of hinges, storm bar brackets, etc. Use height chart below to select your finish height. Width can be any size up to 136" but the minimum width for any one panel is 8". There are 8 different hinge configurations (plan views). Please select one for each opening. #1, 4 &amp; 6 are for single panels sides and #2, 3, 5, 7 &amp; 8 are for doubles (byfolds). Please see planview chart (located on product approval drawings). All Single planviews will have louvers out when open and flat side out when closed. For byfolds, #'s 2 &amp; 5 have that flat side out when closed but #'s 3,7 &amp; 8 have louvered side out in both the open AND closed position. Please note also that different plan views have different gaps (buildout). Keep in mind when choosing a plan view. Storm bars may be used in place of z-bars at the top or bottom of the shutter (but not both).placed approx. Storm bars will be palced approx. 12" from top or bottom according to the drawings.</p>						
<b>Drawings can be found on our website at <a href="http://www.crocinorthamerica.com">www.crocinorthamerica.com</a></b>
